Batch Tracking Solutions

NVS have designed 'easy to use' batch tracking choices that assists your practice to comply with the new VMD regulations.

The following services can be offered, enabling you to select the option which best suits your practice:

Daily Recording, Monthly Reporting

Batch numbers and expiry dates of trackable products which are dispatched from our depot within the month will be sent via email to you each month for your files

Daily Recording & Reporting

NVS can provide batch details to your practice on a daily basis, either as a printed report with the order or as an electronic download direct to your Practice Management System

Daily Recording / Reporting with Product Labelling

For those practices that are able to scan out products at retail level using their Practice Management System. NVS can provide relevant medicines labelled with bar codes containing batch and expiry date information to allow scanning of products into stock and out to the client (daily printed list or electronic download is also available as part of this service)
